## **SharkRack Fact Sheet- Integrity Line 51U**

The Integrity 51U was designed to provide customers with larger Cisco installations with a solution that finally solves the side to side venting issues permitting greater control on airflow.

- 51 RMU of space- plus six zero U spaces.
- SharkFin perforation pattern allowing 72% passive airflow.
- EIA-310-D compliant and backed with SharkRack's TrueFit guarantee. Also RoHS compliant.
- Features SharkRack's airflow management baffle for side to side venting.
- The Integrity cabinet features integrated cable management and is optimized for hot aisle/cold aisle containment.
- Optimized for Cisco Nexus and a variety of other Cisco switches, blade servers from a variety of OEM's and storage.
