Kind of like CPI but way better

There's no doubt that CPI is an excellent company who manufactures a quality product but in the interest of sharing how we think the SharkRack is better we thought we would point out the following:

- SharkRack cabinets can be produced a-la-carte without extending your lead time.
- SharkRack offers one of the largest cabinet paint shops in the country- we have a wide variety of standard and custom colors to choose from.
- SharkRack's Multi-Bay kit fits flush- no air leakage.
- Our catalog is simple- no sifting through hundreds of pages and part numbers.
- SharkRack cabinets feature extensive integrated cable management features.
- SharkRack cabinets allow more passive airflow
- You get a dedicated account manager- and they'll actually meet you!
