## Systems Integrator Program

SharkRack has developed a leading edge program for systems integrators consisting of the following value propositions:

- Private labeled racks and cabinets- helping you improve your footprint with a client's installation and add distinction.
- Customized racks and cabinets for special or unique projects- helping you come out ahead.
- Build ahead program- allowing you to ship orders "on the fly".
- We're fully ISO-9001:2008 certified and RoHS compliant.
- Preferential pricing over other programs and also volume discounts with eligible orders.
- We also offer design retention- allowing us to keep the product design indefinitely.
