Wright Line or Wrong Line?

There's no doubt that Wright Line is an excellent company who manufactures a quality product but in the interest of sharing how we think the SharkRack is better we thought we would point out the following:

- SharkRack cabinets can be produced a-la-carte without extending your lead time.
- SharkRack offers one of the largest cabinet paint shops in the country- we have a wide variety of standard and custom colors to choose from.
- SharkRack's Multi-Bay kit fits flush- no air leakage.
- Our approach is consultative- let us help you **design a solution that works for you.**
- SharkRack cabinets feature extensive integrated cable management features.
- SharkRack cabinets allow more passive airflow than Wright Line.
- SharkRack is customer – not sales focused- we don't just want to win a sale.
