

Having trouble running cables from the front of the cabinet to the back? Try Our Cable Management Tray. Designed for tool-less integration into our T2 cabinets taking up Zero rack units. This tray fits onto the cabinet frame rails with the snap of a pin. Just put it on the frame rail where you want it and snap it in place.

Features and Benefits

- Tool-less installation
- Installs in Zero U space
- Integrated cable management, fits any size T2 cabinet
- Modular so you can move it where you need it
- Velcro straps are used to quickly add or remove cables
