

SharkRack | T2 Preconfigured Racks

All the features of the SharkRack T2 universal cabinet are now available in a preconfigured rack. These T2 "bundles" are configured to match the most frequently ordered configurations. A single part number makes these easy to order. The bundles are available from in-stock supply, so lead time is short.

Each bundle includes:

- 37" deep frame
- Front and rear doors
- 2 side panels
- Vented top
- Mounting rails
- Tipguard

Power:

- Metered for input current monitoring
- 24 outlet
- 208V/30A or 120V/20A
- Fuses and branch circuit protection

These are a great alternative to the Sun 1000-42:

- The T2 costs less
- The bundle power only requires two 30 amp drops rather than Sun's four 20 amp drops
- The T2 is universal and fits other equipment
- The T2 cools better

Part Number	Description	Power
T2EC060-P	Black, 37" deep SharkRack T2 enclosure with vented front and single-panel rear doors, vented top panel, solid left and right side panels. Includes square hole mounting rails, a set of four leveling feet and integrated tip guard	Not included
